

Entiat Rocks On! *Join the fieldtrip after the Summit 3:15 – 4:00*

Following the Success Summit, a tour of Entiat projects and facilities will be available. The bus will take participants through the community to view the new Entiat Fire Station, Abby Dabby Park, Columbia Breaks Fire Interpretive Center, Entiat Park, and the site of Entiat Waterfront Trail and Marina.

The Entiat Fire Station is a project of Chelan County Fire District #8. Land was donated by the City of Entiat and funding has been acquired through a public bond and a Community Development Block Grant. Abby Dabby Park is located on WSDOT right-of-way at Entiat Way. It was a collaborative project of the Entiat Tree Board and the City. Funding was provided by a grant from the North Central Washington Community Foundation, with in-kind support from the City.

The Columbia Breaks Fire Interpretive Center is a non-profit organization that has developed a new master plan for its site, and recently collaborated with the Entiat Historical Society to provide space for a historic barn and display area. The Entiat Park is a project of the Chelan County PUD. As part of the relicensing of the Rocky Reach Hydroelectric project, the PUD has agreed to completely renovate the park and include a waterfront trail that will connect with the City's new trail at the north, and wrap under the Entiat River Bridge to connect to an existing trail on the Entiat River.

Construction on the City's 18-acre Waterfront Trail and Marina site is just beginning. By summer of 2013, the City expects to have completed the access road, restroom, trail, parking area, and all utility infrastructure. The marina is currently in the permitting stage and is anticipated to be a regional draw for boaters and water sports enthusiasts. Funding for these projects came from the Department of Commerce (CTED), Community Economic Revitalization Board, Port of Chelan County, the Washington State Recreation Conservation Office, Pipkin Construction, and the City of Entiat. Additional funding will be required to construct the marina.
